Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

JAPANESE LUNG FLUKE DISEASE.

Washington—November, 1920.

During November, 1920, one case of Japanese lung fluke disease was reported in Washington.

LEPROSY.

Washington, D. C., and Leavenworth, Kans.

A case of anesthetic leprosy was reported diagnosed clinically November 26 and verified bacteriologically November 27, 1920, at Washington, D. C., in the person of C. H. Y., white, male, aged 50. The patient states that the first symptoms of the disease appeared in 1914 and that since that time he has visited various parts of the United States. The patient is now confined under the supervision of the city health officer.

A case of leprosy was reported in November, 1920, at Leavenworth, Kans., in the person of J. J. O., white, male, aged 42. The disease was probably contracted in China. The patient is now in a hospital.

LETHARGIC ENCEPHALITIS.

Illinois, New York, and Oregon—November, 1920.

During November, 1920, there were reported three cases of lethargic encephalitis in Illinois, three in New York, and one in Oregon.

MALARIA.

City Reports for Week Ended Dec. 18, 1920.

Place.	Cases.	Deaths.	Place.	Cases.	Deaths.
